Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Computer Science student at Bangalore Institute of Technology (CGPA: 8.92/10) with hands-on experience in backend development, machine learning, and full-stack web applications. Proficient in Java, Python, and JavaScript with exposure to REST APIs, SQL/NoSQL databases, and agile workflows. Seeking a software engineering internship to apply practical skills in a production environment.

EDUCATION

Bangalore Institute of Technology

B.E., Computer Science and Engineering — Bengaluru, Karnataka

2023 – 2027

CGPA: 8.92 / 10.0

EXPERIENCE

Freelance Web Developer

Oct 2023 – Mar 2024

Independent Clients — Bengaluru (Remote)

- Built and deployed 2 small business websites for local clients using HTML, CSS, and JavaScript, each delivered within a 2-week timeline.
- Integrated contact forms with backend email handling using Node.js, handling ~50 form submissions per month.
- Maintained ongoing client communication and iterated on designs based on feedback, simulating a real-world agile development cycle.

Coding Club

Jan 2024 – Present

BIT Bengaluru

- Organise weekly coding sessions for 20+ members, covering DSA topics and competitive programming challenges on LeetCode.
- Mentored 10 junior students on Python and Java fundamentals.

PROJECTS

Community Complaints & Issue Mapping System — JavaScript, HTML, CSS, REST APIs, MongoDB

- Built a civic issue reporting platform with real-time geolocation and image upload; supports 100+ concurrent report submissions.
- Designed RESTful backend services for complaint lifecycle management (create, assign, resolve), reducing average resolution tracking time by 60%.

AI Communication Platform — Python, Machine Learning, NLP, Flask

- Developed an accessibility-focused platform integrating speech-to-text (95% accuracy on test set), real-time translation across 5 languages, and text-to-speech output.
- Targeted users with hearing and speech disabilities; validated with 15 test users and achieved a 4.2/5 usability rating.

House Price Prediction Model — Python, scikit-learn, Pandas, NumPy

- Trained a regression model on 10,000+ records achieving $R^2 = 0.87$ on the validation set after feature engineering and outlier removal.
- Performed end-to-end ML pipeline: data cleaning, encoding categorical variables, hyperparameter tuning via GridSearchCV.

Inventory Management System — Python (Django), MySQL

- Designed a database-driven inventory system with full CRUD operations, supporting 500+ SKUs and role-based access for admin/staff.
- Reduced manual stock-check time by an estimated 70% through automated low-stock alerts and reporting dashboards.

Flight Management System — Java, OOP, Collections Framework, REST APIs

- Implemented a backend system managing 200+ flight records with custom comparators for sorting by price and departure time.
- Achieved sub-100ms query response time on booking lookups using optimised HashMap-based indexing.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript

Web Technologies: HTML, CSS, JavaScript, Django (Python), Node.js (basics), REST APIs

Databases: MySQL, Oracle SQL, MongoDB

Tools & Platforms: Amazon Web Services(AWS), Linux (basics), VS Code, Postman

DevOps: Git, GitHub, Jenkins, Maven, Gradle, Apache Tomcat

Core Concepts: Data Structures & Algorithms, Object Oriented Programming, Database Management System, Operating System, Software Engineering, DevOps, Artificial Intelligence, Machine Learning, Cloud Computing

Machine Learning: scikit-learn, Pandas, NumPy, NLP basics, Regression, Classification

CERTIFICATIONS

Data Structures and Algorithms using Java — *Infosys Springboard*

Python Essentials 1 | PCEP-30-02 — *OpenEDG*

Google Cloud Computing Foundations Certificate — *Google Cloud*

Software Engineering Job Simulator — *JP Morgan Chase (Forage)*

Generative AI Series — *Google Cloud*
